💼 PROFESSIONAL EXPERIENCE

Tata Consultancy Services

Frontend Developer

10/2020 – present

- Developing new web applications using VueJS/ReactJS as per the client requirements.
- Integrating client-requested features into existing sites to enhance functionality and user experience.
- Providing technical support to team members, aiding in problem-solving and ensuring smooth project execution.
- Collaborating with cross-functional teams including backend developers, designers, and project managers to align frontend development with project goals.
- Contributing to project planning sessions, offering insights into the feasibility of proposed designs and features.
- Leading a team of 5 developers for a development project, overseeing project milestones, resource allocation, and ensuring timely delivery.
- Effectively communicating project requirements, progress updates, and technical insights to stakeholders and clients.

🏆 ACHIEVEMENTS

Creation and Implementation of Unified Style Guide and Component Library

Created a style guide and component library to ensure consistency and scalability, streamlining development and enhancing team collaboration.

Strategic Development of Reusable Components

Developed and implemented reusable components that significantly reduced development time, enhancing team efficiency and accelerating project delivery.

Automated Task Management Integration

Automated task management between Wrike and Jira, reducing manual effort and ensuring seamless Jira ticket creation from Wrike tasks.

🏠 PERSONAL PROJECTS

CodeCollab

Code Collab provides a collaborative coding platform with real-time editing, syntax highlighting, and auto-suggestions, complete with private rooms and integrated chat for seamless communication.
